

Find support. Know your next step.

SevaManipur AI

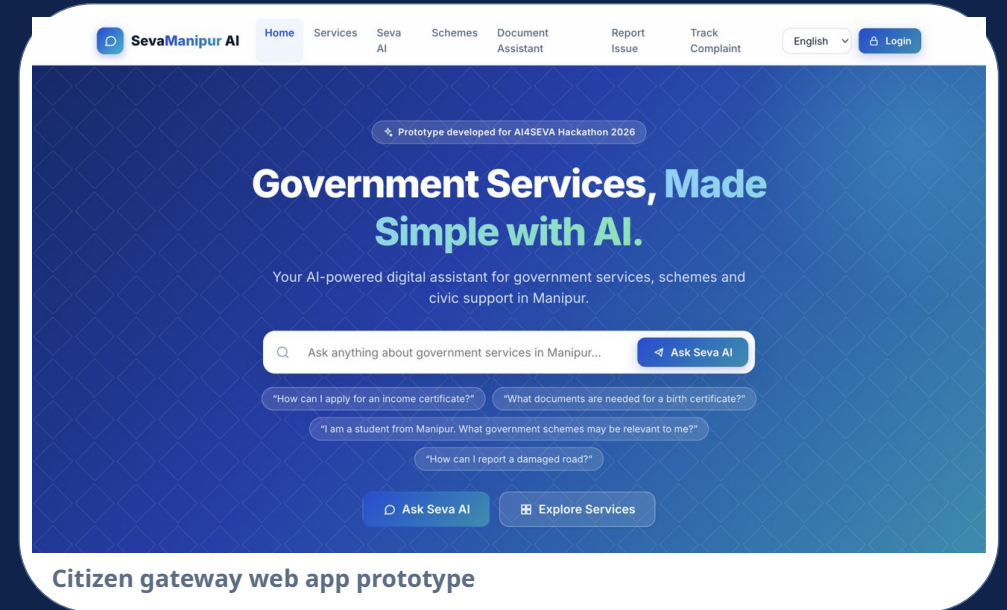

SW-01 · Welfare Scheme Navigator

Find possible matches, understand requirements and plan what to do next.

PITCH PRESENTATION

SW-01 · SOCIAL WELFARE

9 OCTOBER 2026

PROFILE → POSSIBLE MATCHES → NEXT STEPS

Prototype developed for the AI4SEVA Hackathon. Not an official Government of Manipur website.

Help citizens move from questions to next steps

THE CITIZEN PROBLEM

“What might fit me?”

Scheme rules can be hard to find and compare.

“What do I need?”

Documents and application steps are spread across sources.

“What happens next?”

People need guidance, while the department makes the final decision.

OUR RESPONSE

01 Share basics

Age · income · work · area

02 See possible matches

Basic rule checks + reasons

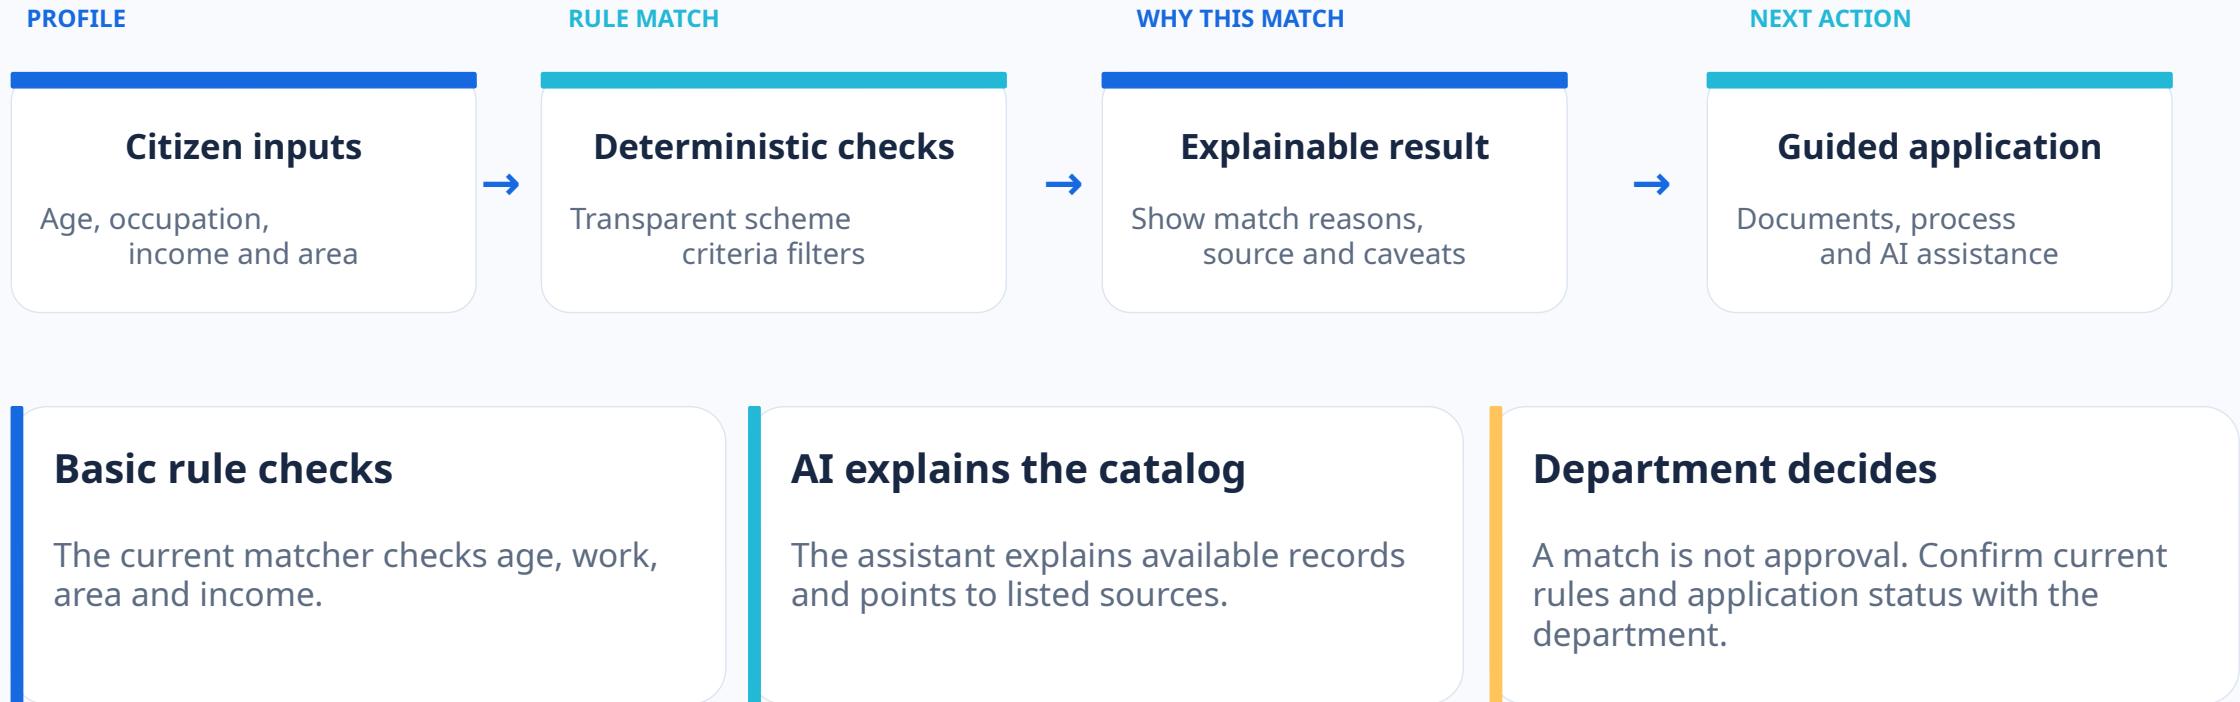

03 Plan next steps

Documents · process · official links

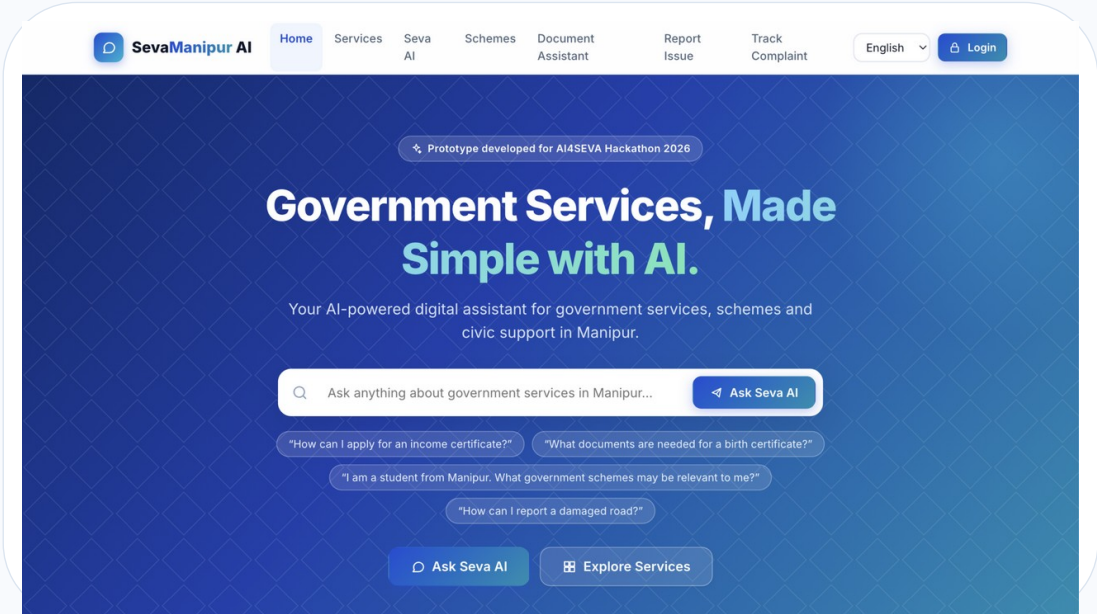

The app offers guidance. The department decides eligibility.

Clear rules. Useful explanations. Human decisions.

The matcher is a prototype: scheme-specific checks, such as disability or widow status, still need to be added.

What works today — and what needs validation

CURRENT PROTOTYPE

Scheme finder

Basic checks: age, work, area and income

Seva AI

Explains catalog information in a chat

Languages

English, Hindi and Meiteilon controls; translation review remains

Live architecture

Vercel app and APIs; Supabase catalog and signed-in data

DATA STATUS

7 source-linked Social Welfare records are in Supabase; the department must confirm current rules and availability. Other records are samples.

Next: validate the catalog, add scheme-specific rules and test with citizens.

A practical pilot needs a trusted owner

PUBLIC VALUE FIRST

Keep scheme discovery and guidance free for citizens.

Pilot & learn

Test whether citizens reach the right next step.

Protect users

Minimize personal data and review privacy needs.

SUSTAINABILITY MODEL

Content owner

Department reviews rules, sources and links.

Review schedule

Check changes and application status regularly.

Fund operations

Hosting and maintenance need an approved owner and budget.

Expand in stages

Add departments after their records are reviewed.

A real service needs an accountable content owner and a regular review cycle.

This is a proposed pilot model; no government partnership or funding is claimed.

Start with Social Welfare. Expand after review.

A focused entry point

Keep state and central schemes clear. Add departments only after checking their information.

FIRST DATA DROP

7 Social Welfare records link to official sources; current rules and application status need department confirmation.

PILOT IN PHASES

01 Verify

Social Welfare sources + rules

02 Pilot

Test with citizens and staff

03 Expand

Add reviewed departments

Built for careful growth

- One catalog with sources and review dates
- Simple matching rules, separate from AI explanations
- Vercel app with Supabase catalog and user data
