“National Innovation Challenge on AI & Digital Governance – Manipur”

AI4SEVA HACKATHON 2026

Innovate • Build • Serve

AI-Powered Solutions for
Better Governance and a Brighter Future

HACKATHON HANDBOOK

- Participant Guidelines
- Evaluation Framework &
- Event Schedule

Important Timeline

Activity	Date / Time
Problem Statements Release	7 October 2026, by 7:00 PM
Preparation & Development	7–8 October 2026
Registration Opens	9:00 AM
Pitching & Evaluation Begins	9:30 AM onwards

Teams may choose a problem statement of their preference from the list provided. Upon selection, teams are encouraged to immediately commence work on their proposed solution, including problem analysis, research, solution development and preparation of a functional prototype from home prior to the hackathon day.

The event on 9 October 2026 will primarily focus on prototype demonstration, pitching, technical validation, assessment of government relevance and industry evaluation.

Guidelines

Every team will go through three rounds of evaluation:

1. TECHNICAL TRUST — 35%

Focus: Does the solution work, and can it be trusted?

Judges will assess:

- Working prototype
- Technical architecture and implementation
- Effective use of AI
- Data handling
- Security and privacy
- Reliability and responsible AI practices

2. GOVERNMENT RELEVANCE — 30%

Focus: Does the solution genuinely address a government problem?

Judges will assess:

- Understanding of the problem statement
- Relevance to the concerned department
- Practical usefulness
- Citizen/official value
- Feasibility within a government context
- Potential for adoption or further testing

3. INDUSTRY POTENTIAL — 35%

Focus: Can the solution evolve into a practical, scalable product?

Judges will assess:

- Problem–solution fit
- Innovation
- Product quality and user experience
- Scalability
- Deployment potential
- Presentation and ability to respond to questions

Beyond the Hackathon

Participants will also have the opportunity to attend insightful sessions covering:

Panel Discussion on:

“From Departmental Challenges to AI Solutions — Shaping the Future of Governance” with officials from:

- Public Works Department
- Department of Agriculture
- Department of Transport
- Department of Youth Affairs & Sports
- Social Welfare Department
- Department of Education (S)

Moderator: *Shri G. Robert Sharma*, Director (IT), Government of Manipur

Expert Sessions:

“Entrepreneurship”

- *Dr. Jatin Botadra*, CTO, Pioneer IT Solutions Private Limited

“Turning a Product Idea into Business”

- *Shri Roshnikumar Yambem*, Managing Director, Globiz Web Solutions Private Limited

“A Pathologist's Entrepreneurial Journey Beyond the Lab”

- *Dr. Thangjam Dhabali Singh*, Chairman & Managing Director, BABINA Group of Companies

“Seeing the Problem Through the User's Lens”

- *Ms. Ritika Chetri*, Program Manager, Data Analysis, Sauramandala Foundation

“From Need to Solution: Using AI Effectively for Public Service”

- *Mr. Rohan Bose*, Software Analyst, Sauramandala Foundation

On the Hackathon Day

- Arrive on time for registration at 9:00 AM.
- Be ready for pitching from 9:30 AM onwards.
- Keep your prototype ready before your assigned presentation slot.
- Demonstrate the working solution, rather than only presenting slides.
- Clearly explain how your solution addresses the assigned government problem.
- Answer questions from the technical, government and industry panels confidently and honestly.
- Attend the panel discussion and expert sessions—they are intended to provide practical insights into governance, entrepreneurship, product development, user needs and AI implementation.
- Maintain professional conduct throughout the event.

Breakfast and lunch will be
provided to all registered
participants.

*“Wishing all teams the very best!
Build boldly, innovate wisely, and create real impact.”*
