

Know the support you may qualify for.

SevaManipur AI

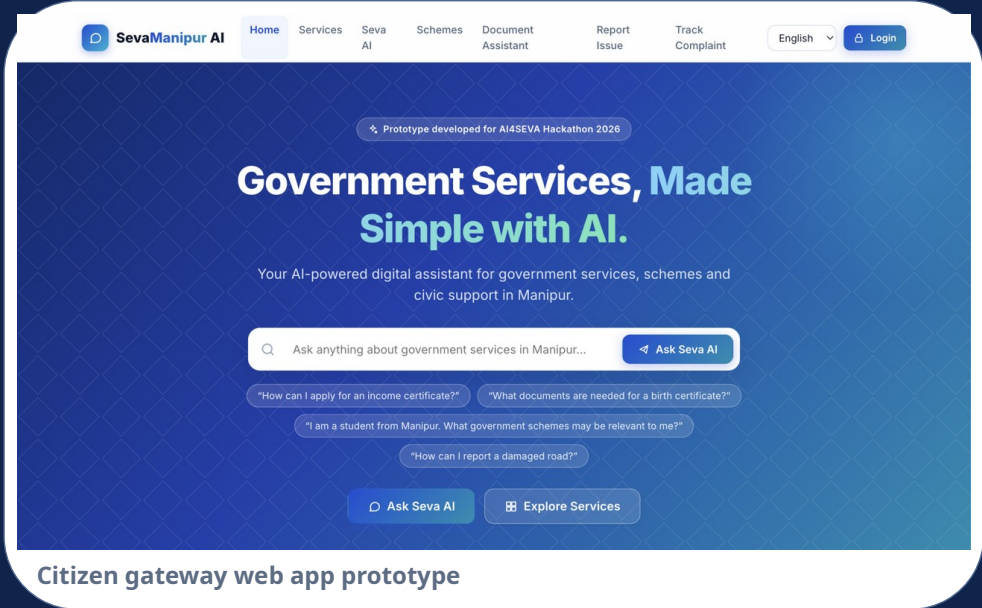

AI-based Welfare Scheme Eligibility & Assistance Navigator

Understand possible eligibility, required documents and next steps — in simple language.

TEAM NUMBER [ADD]

TEAM NAME [ADD]

9 OCTOBER 2026

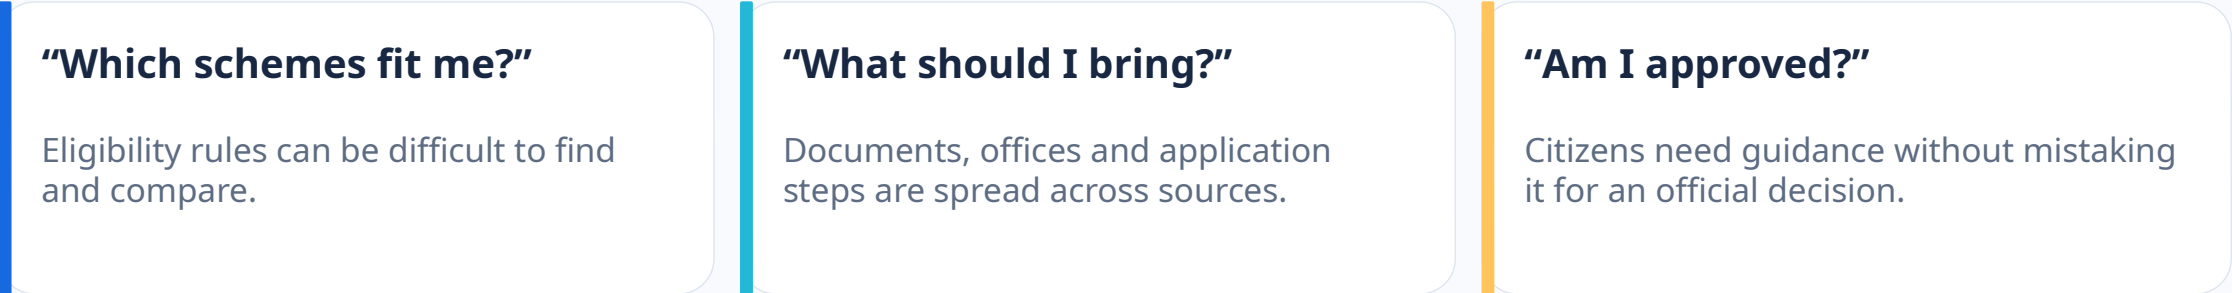

PROFILE → MATCH → GUIDANCE

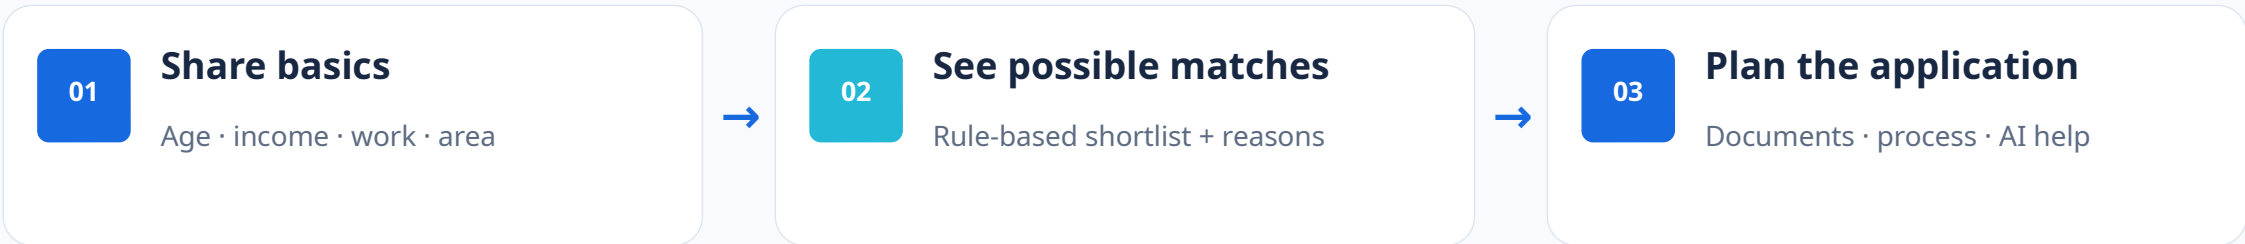

Prototype developed for the AI4SEVA Hackathon. Not an official Government of Manipur website.

From scheme confusion to a clear next step

THE CITIZEN PROBLEM

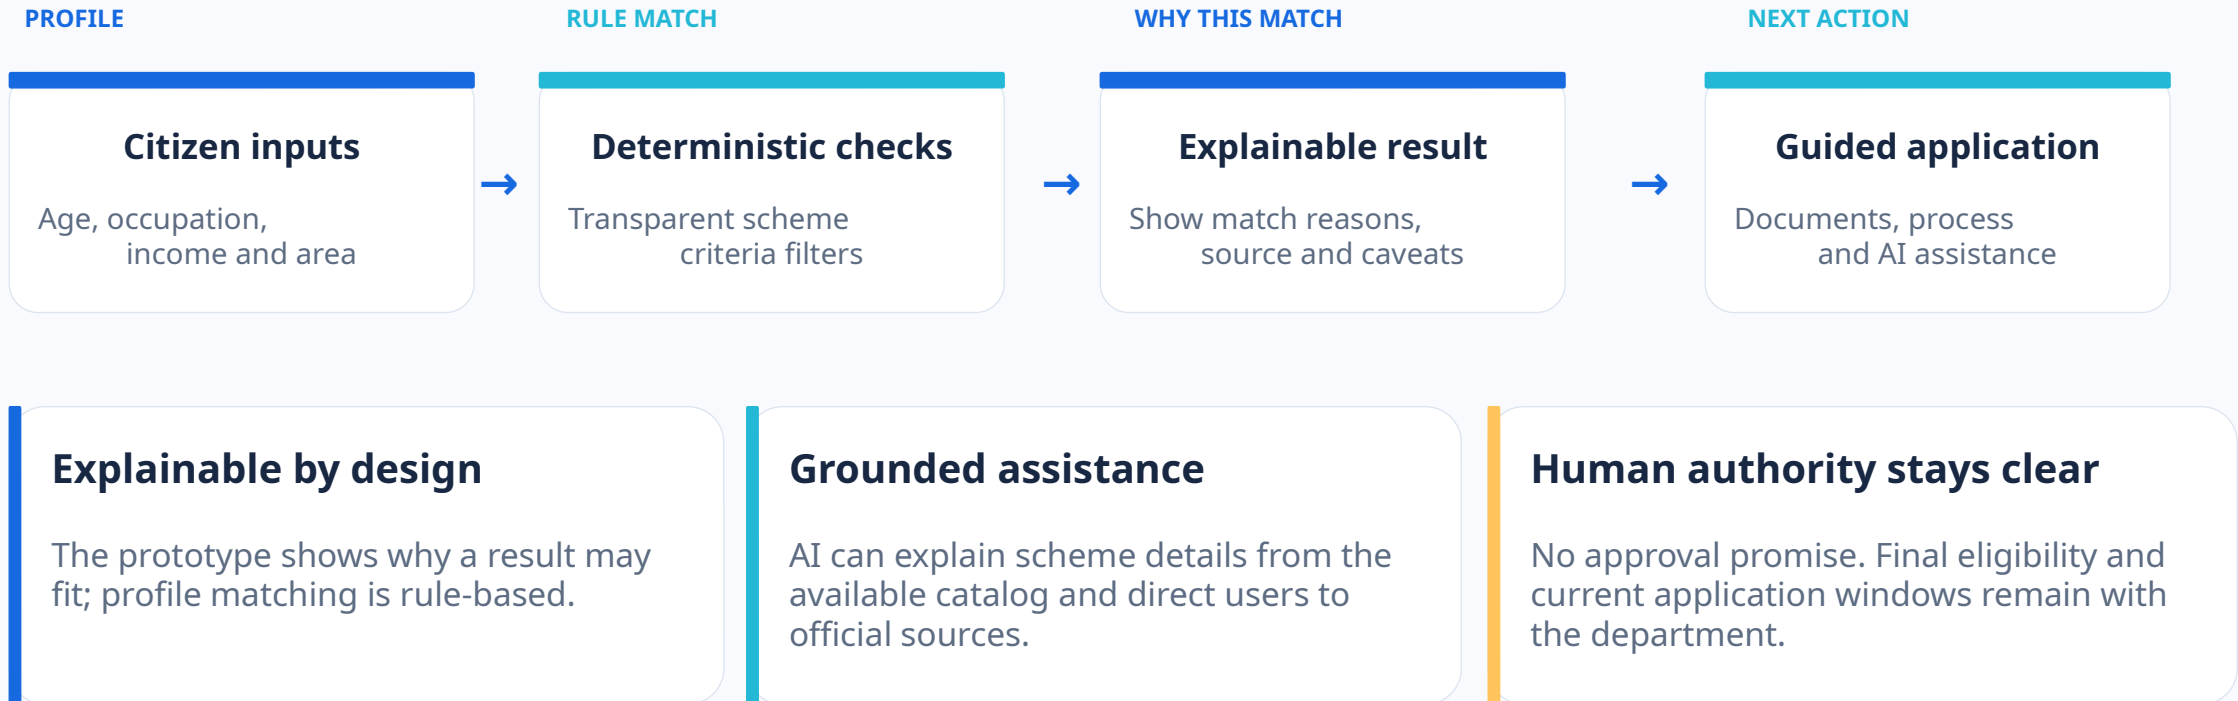

OUR RESPONSE

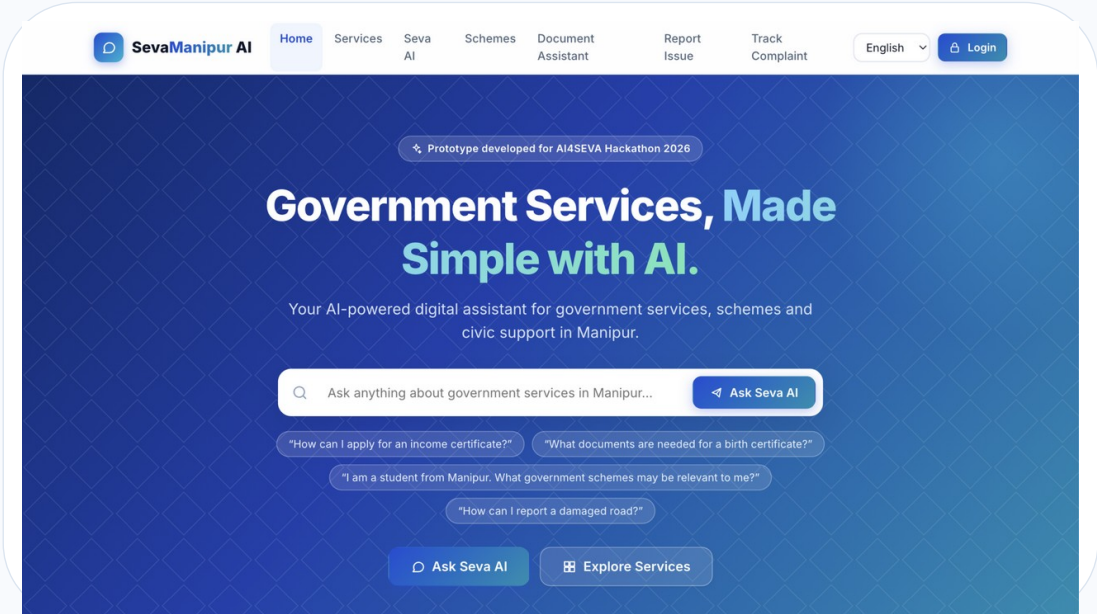

The department makes the final eligibility decision. SevaManipur AI helps citizens prepare and navigate.

A navigator, not a black-box decision

Current matcher checks age, occupation, rural/urban area and income. Scheme-specific checks (for example disability or widow status) need to be added before broad eligibility claims.

A working prototype with a clear path to guidance

Current home screen · live typed question handoff to Seva AI

CURRENT PROTOTYPE

Scheme matching

Profile fields → shortlist → “why you may qualify”

Ask Seva AI

Continue with a question about a scheme or service

Languages

English, Hindi and Meiteilon interface support

Web deployment

React + Vite frontend on Vercel; serverless API routes

DATA STATUS

Current app uses sample catalog data. Supabase schema + sourced seed are prepared, but not connected yet.

Next product step: load the reviewed catalog, then add scheme-specific eligibility fields and freshness checks.

Sustain the service through trusted ownership

PUBLIC VALUE FIRST

Free citizen access to scheme discovery and application guidance. No fee to check possible eligibility.

Pilot & measure
Track successful referrals, helpfulness and data corrections.

Operate securely
Use managed hosting and database; minimize personal data.

SUSTAINABILITY MODEL

Department partner
Approves scheme wording, eligibility and application links.

Maintained catalog
Named owner reviews sources and freshness on a schedule.

Public procurement
Long-term hosting and support can be funded through an approved government programme or contract.

Expand responsibly
Add departments only after their scheme data is validated.

Sustainability depends on an accountable content owner and a regular verification cycle — not on AI alone.

Potential operating model; no government partnership or contract is claimed at this prototype stage.

Start with Manipur. Grow from verified data.

A focused entry point

Begin with Social Welfare guidance, then broaden discovery without mixing jurisdiction or department.

+ Department filter

FIRST DATA DROP

7 official-source-linked Social Welfare records prepared; current application status still requires department confirmation.

SCALE IN PHASES

01 Validate

Social Welfare sources + user testing

02 Extend

More departments + districts

03 Improve

Languages + assisted access

Scalable building blocks

- Shared scheme catalog with source, department, jurisdiction and review date
- Rule-based matching separated from conversational explanation
- Vercel web delivery; Supabase catalog integration is the next step

SevaManipur AI is a prototype developed for AI4SEVA 2026; not an official government service.
